

Fiberglass Recycling Station

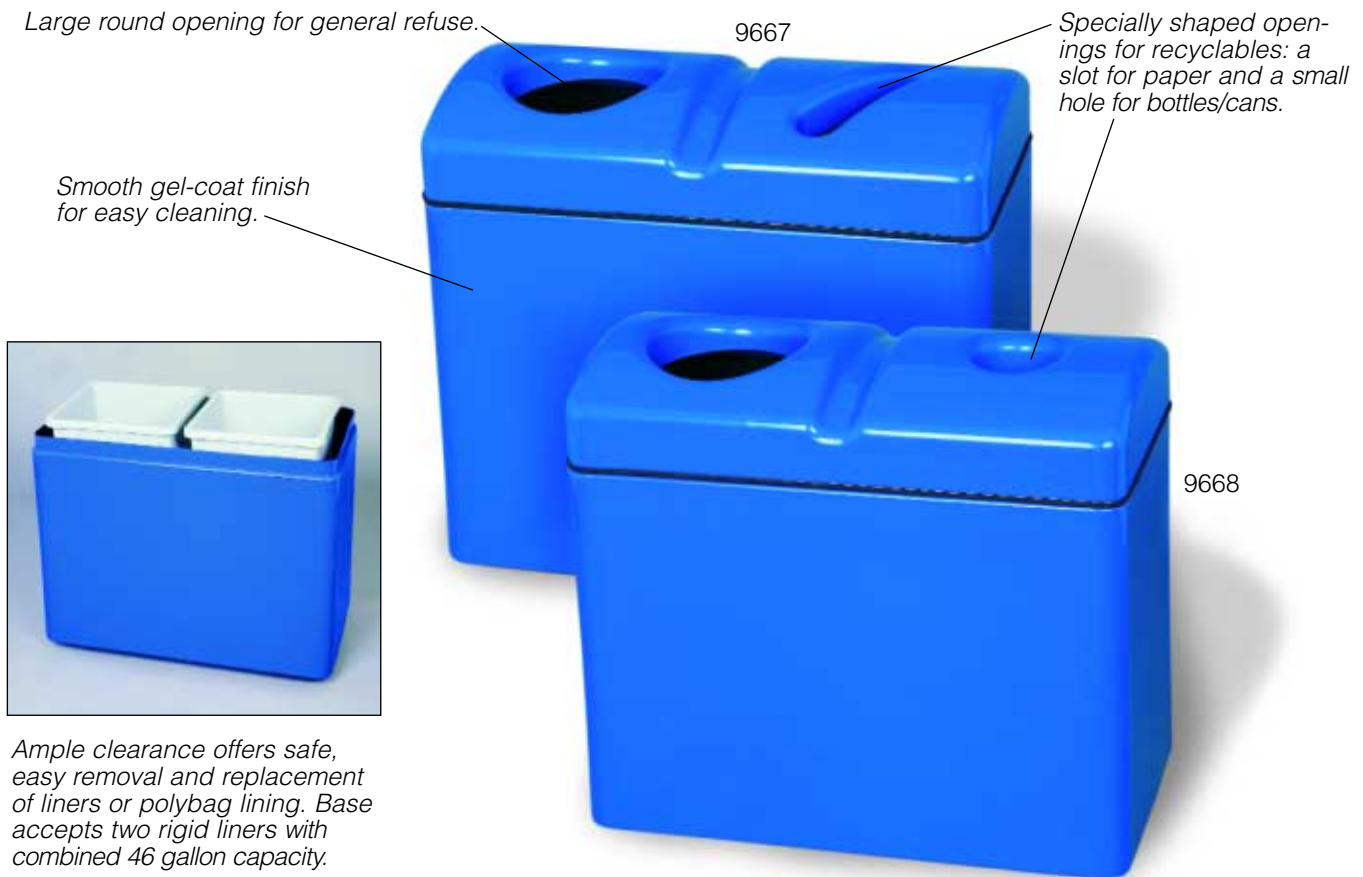

Collection, convenience and style in one container.

Successful recycling requires more than just a designated container. Easy sorting, adequate capacity & convenient emptying along with safety and aesthetics are also important considerations. The new Rubbermaid® Fiberglass Recycling Station offers all of these and more.

Available in two versions, this generously sized container is perfect for use in high volume areas. Use the paper and trash combination near copiers and printers where sorting office paper from other waste is necessary. The bottle and trash version is ideal near entranceways and vending areas where hands-free waste disposal is important. Equipped with two 23-gallon plastic liners,

each container can easily accommodate the waste from high-traffic areas. Ample clearance allows convenient removal and replacement of liners or polyliner bags, and the smooth finish cleans effortlessly. Both stations are constructed of a durable, lightweight Class I Fire Retardant Resin and are ADA compliant. They also feature a high quality UV-stabilized gel-coat finish to protect color and extend product life. For these reasons, both models are well-suited for even the most upscale interior settings.

Rubbermaid's Fiberglass Recycling Station—Collection, convenience, and style in one container—an appealing combination.

Fiberglass Recycling Station
