

# Rough Pro™ Wet Mop

## Tough Mop for Rough Floors

When you need to mop slip-resistant tile, concrete, raised, textured or stone floors, you need a mop that can withstand abrasion. Conventional mops can lint or even disintegrate on these types of floor surfaces. They're not launderable, require constant replacement and offer poor absorbency and release qualities. They soon become ragged, unsightly and unusable in dust-sensitive environments.

Rubbermaid's new Rough Pro™ Wet Mop offers the solution to mopping non-skid surfaces in foodservice establishments, commercial and retail buildings and hospitality environments. It leaves floor surfaces cleaner because it's made of a knitted white cotton/polyester fleece blend that attracts and retains dirt particles better than cotton mops. It has twice the absorbency and release of conventional cotton mops so it's ideal for high-traffic areas where floor appearance is crucial. Its extended life and value pricing help you save money.

Count on the Rough Pro™ Wet Mop—it won't fall apart when things are rough.

**Conventional Cotton Mop**      **Rough Pro™ Wet Mop**

*Rough Pro™ Wet Mops outperformed ordinary cotton mops when subjected to identical laboratory testing on a metal grit impregnated tile floor, simulating the mopping of over 50 miles of floor surface.*

*Knitted fleece cotton/polyester blend yarn has twice the absorbency of cotton.*

*Looped ends and tailband aid in launderability.*

*Wide 5" headband is compatible with Swivel Grip™ Handle (Gripper® head only) and Gripper® Wet Mop Handle.*

## Rough Pro™ Wet Mop
